pool owners: cut heating costs with solar energy

FAFCO's Solar Heating System slashes your fuel costs using a free natural resource—the sun. FAFCO has successfully pioneered the *manufacture* of an *economical* solar heating system for swimming pools. The facts and figures are in: our solar heating system will pay for itself in two to five years with reduced heating costs—and save precious fossil fuels.

FAFCO's system is integrated into your existing pool system—filter, pump, piping—with no separate return line to the pool required. The system requires virtually no maintenance and can be installed by you or your FAFCO dealer on a new or old pool of any size. FAFCO's optional solar-operated Automatic Control turns the system on and off automatically.

For free, no-obligation estimates call or write:
