

# FACTS ABOUT OUR ARENA

The home arena of the Fresno Bombers is a specially planned facility that might best be called a bowling theater. It was envisioned that way, in accordance with the NBL philosophy, by Bombers' owners Bill Carroll, Ellsworth Hobler and Ralph Tucker who explain: "Traditional bowling centers are planned and laid out for the convenience of participants. This one stresses the needs and convenience of spectators." The building is shaped like a theater, 80 feet wide and 180

feet in depth, fronted by a foyer that houses ticket windows and concessions. The 1662 seats are arranged theater-fashion behind the approaches and along the sides of four championship lanes. Theater-type lighting will pick out and dramatize the action. And theater-type acoustics will emphasize the bowling sounds while holding down extraneous noises. There are scoreboards and pin indicators for each pair of lanes. AMF bowling equipment is used throughout.
